

Liberians Advocacy For Change

Dr. Eugenia Wiyata Burphy

Dual citizenship is very crucial to the rebuilding process of Liberia and maintaining our identity as people of substance.

I hold this dear to my heart as I look at other African nations that had gone through similar problems as we did 1980 - 1990 has gravitated to their people in the diaspora for help by making the path easy for returning to their homeland.

Whenever, I see or hear of other countries development in the media, it energizes me to continue the fight for dual citizenship.

Over the past years Liberia has made great strive in the rebuilding, however, much more can be done by paving the way to dual citizenship, thereby utilizing the expertise of thousands of born Liberian in the diaspora.

The Liberian advocacy for change was founded by Mrs. Comfort k. Itoka, who truly believes in the power of dual citizenship for the development of our homeland Liberia.

While we wait for the Liberian Constitution to be amended allowing multiple citizenship for born Liberians and their children, I encourage all Liberians in the diaspora to get involve in the advocacy to rebuild Liberia by making contributions to organizations or offer services in areas of their expertise. I am involved, and you can too.
